How To Implement Project-Based Learning & Collaboration In An Online Environment Tuesday, October 27 ~ 1:00-2:15pm (Eastern)

Once the live date has passed, this training will be available on demand.

Overview

Project-Based Learning has long been understood as a cornerstone High-Impact Practice (HIP) in higher education. Data from spring 2020 student surveys tell us that it is one of the learning activities that students struggled the most within a remote setting. During this interactive webinar, you will learn how to create project-based learning assignments that engage students and facilitate effective collaborations and tools that can be used to help students work together. This webinar will also examine ways to incorporate more student agency into the process, which leads to greater engagement by the students and more substantial final projects and products. Project-Based Learning can be done to great success remotely, as long as we plan and design for our current moment's affordances and limitations. After this webinar, you will have a solid plan to design and incorporate project-based learning into your courses.

Objectives:

- Understand the specific challenges for PBL and collaborative assignments in online environments
- Identify community-building strategies before PBL starting
- Explore ways to increase student agency in online environments
- Create template project agreements for PBL
- Improve scaffolding for PBL for online environments
- Create an assessment plan for the deliverables
- Identify digital tools that could be used in online PBL

Who Should Attend?

- Administration
- Faculty
- Online Learning
- Any educator interested in learning more about online assignment collaboration

How To Implement Project-Based Learning & Collaboration In An Online Environment

Speaker(s)

Students found PBL to be a challenge during the Spring 2020 online pivot for obvious reasons. But, with a little planning, we can still implement the high-impact practice of collaborative work in an online environment. If anything, it is an opportunity for us to create more authentic, more meaningful projects for the students to engage with the course content.

Lee Skallerup Bessette has been working at the intersections of digital learning, critical pedagogy, and learning design for over a decade. Her writing on online learning and digital pedagogy has appeared in Inside Higher Ed, The Chronicle of Higher Education, Women in Higher Education, The National Teaching and Learning Forum, ProfHacker, and The Journal of Interactive Technology and Pedagogy, among other places.

She was the lead for the project to incorporate digital fluency into the campus curriculum while she was at University of Mary Washington. Her work at Georgetown includes coordinating programming for the Georgetown Domains project. You can read more about her work at readywriting.org.
